BILJEŠKE – NOTES

2002

Fifty years of “Bilješke – Notes” (1951 – 2001)

Along with a celebration of the seventieth anniversary of Acta Adriatica, we are also observing the fiftieth anniversary of the publication of the first issue of «Bilješke – Notes». The Institute of Oceanography and Fisheries initiated that publication with the aim of allowing scientists to publish their results as quickly as possible, occasionally before finalizing data processing or fully formulating a new idea. The Notes are issued when necessary.

In the past fifty years 85 issues have been published, written by 84 authors and coauthors. The form of the publication has not essentially changed in time.

The language is English in 55%, French in 20%, and Croatian in 12% of the articles. From 1985 on, English has been the only publishing language. Authors are mostly from the Institute staff (70%), but there are also contributors from Italy, Egypt, Turkey, Greece, France, Germany and Norway.

For this occasion the Institute librarian Mrs. Milica VUČEMILOVIĆ, with help of Mr. Miroslav KOŽUH, prepared the cumulative list of papers, which, together with the Author index, is being published in this issue.

Dr. Mira ZORE – ARMANDA
Editor in Chief

Pedeset godina “Bilješke – Notes”

U povodu godišnjice izlaženja prilažemo listu objavljenih radova i indeks autora. Do sada je objavljeno 85 radova od 84 autora i koautora.
